Economic and Social Impacts

Wirtschaftliche und gesellschaftliche Auswirkungen

Technik & Umwelt

Arnulf Grüber

Impacts of TC on Economy

- Output growth
- Scale and scope economies
- Productivity and efficiency
- Prices
- Variety, complexity, quality
- Division of labor

Technik & Umwelt

Arnulf Grüber

Impacts of TC on Growth

- Direct: Output growth (new products/services)
- Indirect:
 - Productivity growth
 - Price declines
 - Quality improvements
- Indirect:
 - Less *in* per *out* (resource sparing)
 - More *out* per *in* (yet more growth)

Technik & Umwelt

Arnulf Grüber

Output

Technik & Umwelt

Arnulf Grüber

Growth of Mass Production/Consumption

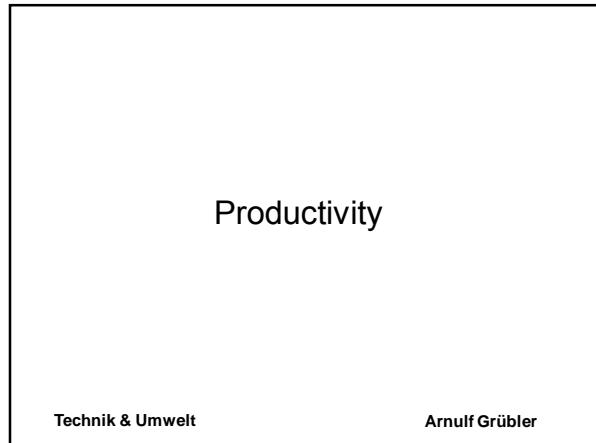

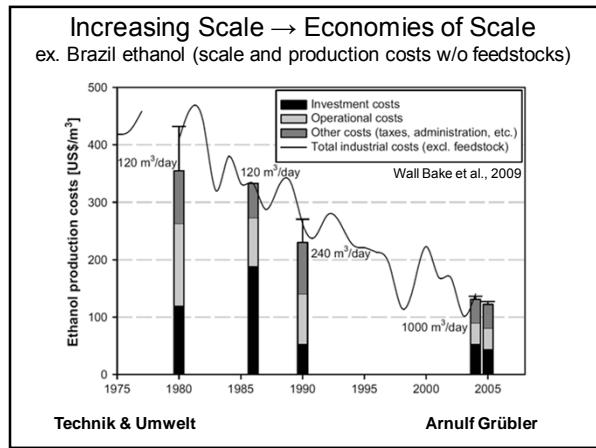

Objects in Use:	1950	2005	Factor increase
Merchant ships (10^6 dwt)	93	633	7
Motor vehicles (10^6)	70	882	13
Telephones, fixed+mobile (10^6)	70	3480	50
Radio sets (10^6)	226	2505	11
TV sets (10^6)	45	1988	44
Annual Production:			
New book titles (10^6)	<200	-1000	>5
Raw steel (10^6 t)	188	1147	6
Paper (10^6 t)	50	364	7
Fertilizer (10^6 t nutrient-equiv)	13	171	13
Activity per Year:			
International tourists (10^6)	28	811	29
Air passengers (10^6)	23	1970	86

Data sources: UN, World Bank, ITU, IISI

Scale

Technik & Umwelt

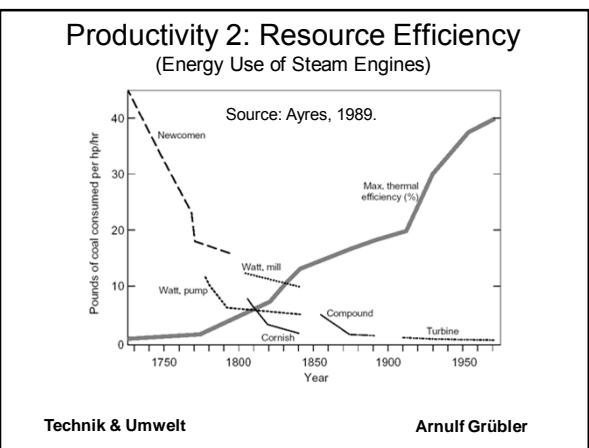

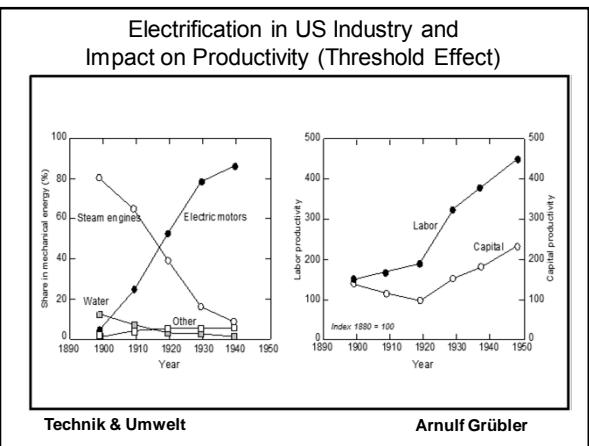

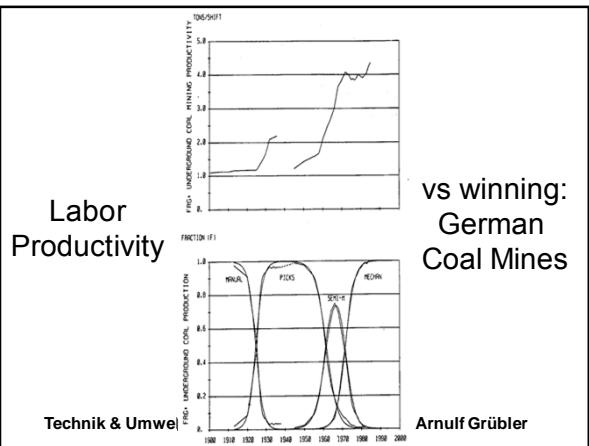

Arnulf Grüber

Examples of Productivity Growth

	Factor..	% / year
Costs of overseas telephone call (New York – London) 1925-1995	300..	8.5..
Output/hour per industry worker (UK) 1800-2000	200..	2.8..
Primary energy use per GDP (USA) 1800-2000	~7..	~1.0..

Arnulf Grübler

Cost Declines in Refrigerator Costs in US

On example of cost declines + quality improvements (efficiency) see Bill Nordhaus example of Light
Posted on the class server: [nordhaus_lighting_1998.pdf](#)

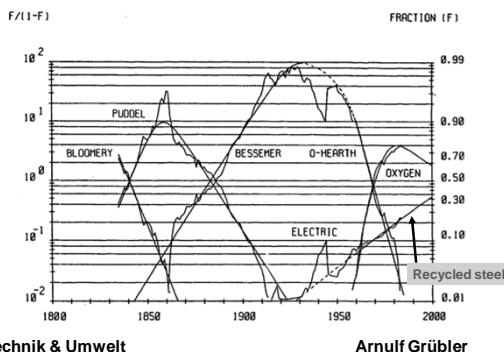

Germany – Steel Prices (Current and Constant Mark/Ton)

Technik & Umwelt

Arnulf Grübler

Costs Improve via TC (German Steel Production Process Change)

Technik & Umwelt

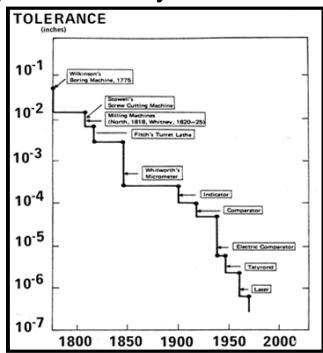

Arnulf Grübler

Quality:
Accuracy, Performance, Variety
(economies of scope)

Technik & Umwelt

Arnulf Grübler

Quality 1: Accuracy of Metal Machinery

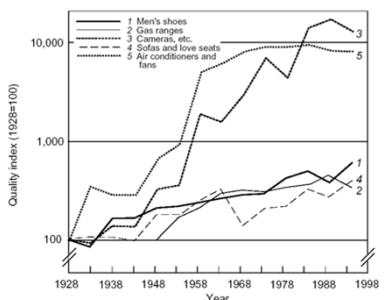

Technik & Umwelt

Arnulf Grübler

Quality 2: Consumer Products

(Lower Price and Higher Quality = Consumer Surplus)

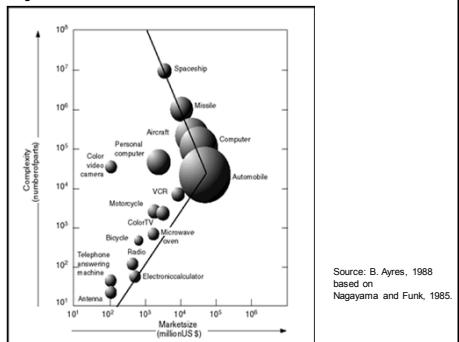

Source: Payson, 1994.

Complexity

Technik & Umwelt

Arnulf Grüber

Complexity vs. Market Size of Products

Technik & Umwelt

Arnulf Grüber

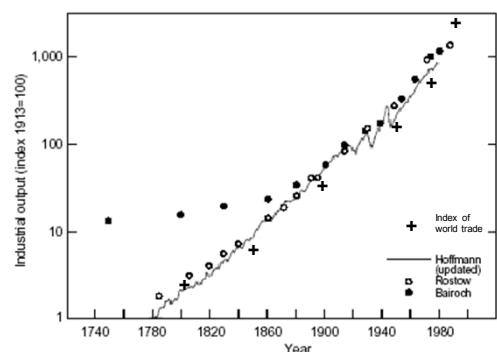

Division of Labor

- Functionally: Specialization:
Engineering; ecology; →
Industrial engineering; social ecology; →→
Industrial ecology
- Spatially: Interdependence
 - local and regional trade
 - international trade
 - globalization

Technik & Umwelt

Arnulf Grüber

World – Growth in Industrial Output and Trade (1913=100)

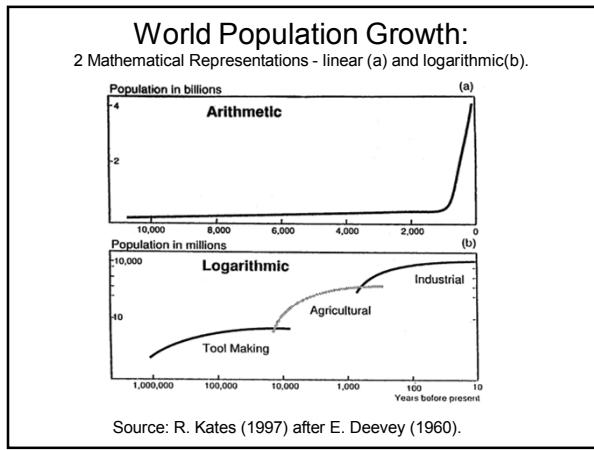

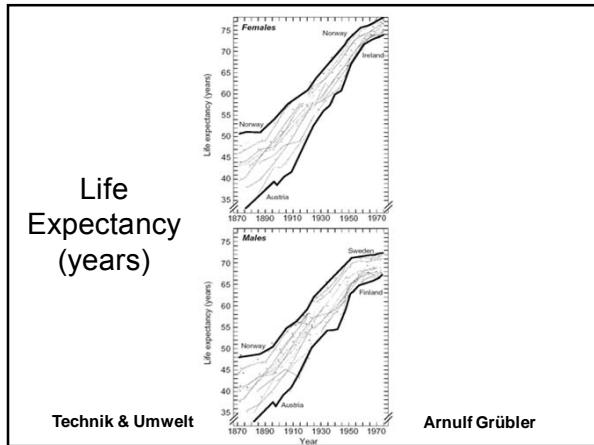

Impacts of TC on Society

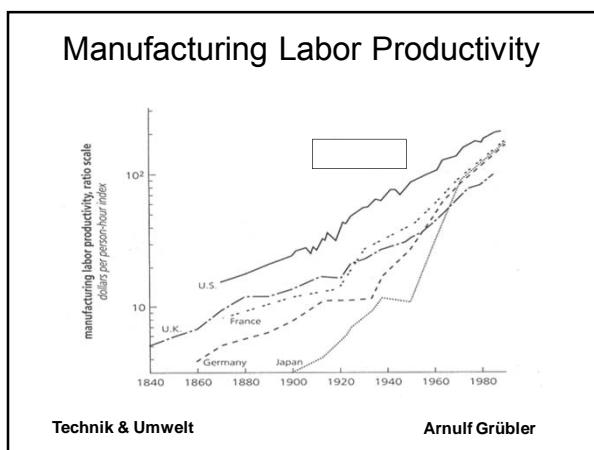

- Demographics
- Income
- Working time
- Structural changes:
 - Rural – urban
 - Primary – tertiary
 - Work - pleasure

Technik & Umwelt

Arnulf Grüber

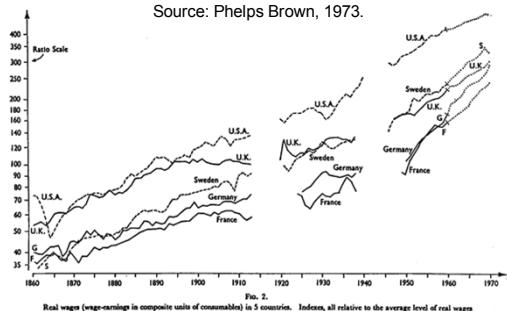

Growth in Real Wages

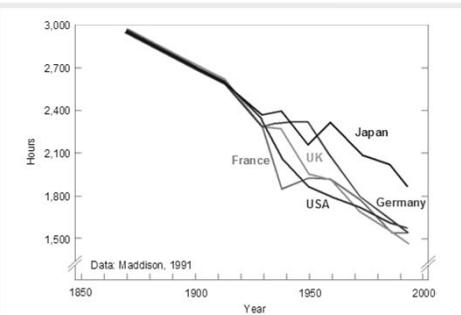

Source: Phelps Brown, 1973.

Technik & Umwelt

Arnulf Grübler

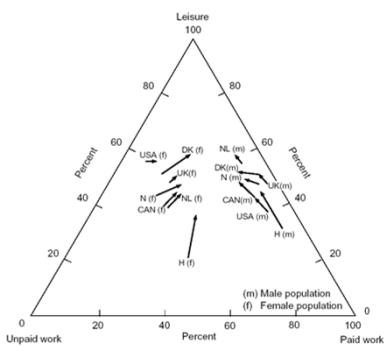

Reductions in Working Time (hours per year)

Technik & Umwelt

Arnulf Grübler

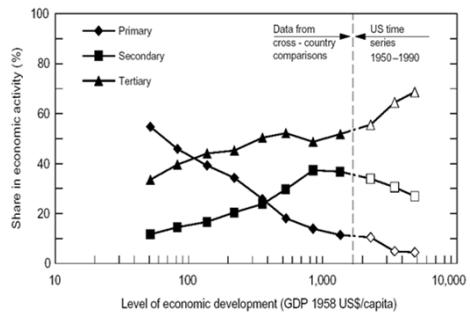

Changing Time Budgets (Gershuny, 1991).

The Original Kuznets (1971, updated) Curve: Economic Structural Change

Technik & Umwelt

Arnulf Grübler

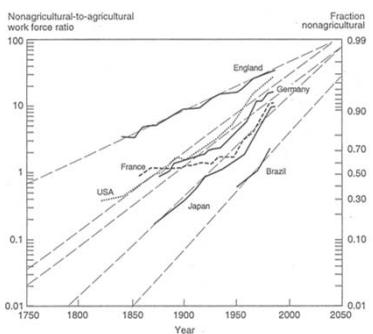

Kuznets Curves

- Originally: Income disparity as a function of income levels (GDP/capita): “Inverted U curve”.
- Industrial Ecology: Environmental Impacts (per unit output, etc..) vs. income levels.
- Evidence: OK for traditional pollutants; none for “modern” (affluence) pollutants like CO₂.
- Empirics: Beware of cross-sectional generalizations (always look at longitudinal trends as well).

Technik & Umwelt

Arnulf Grübler

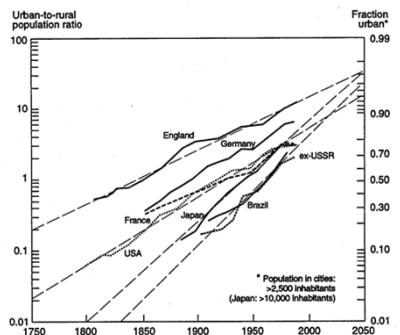

Spatial Relocation 1: Moving Away from Agriculture

Technik & Umwelt

Arnulf Grübler

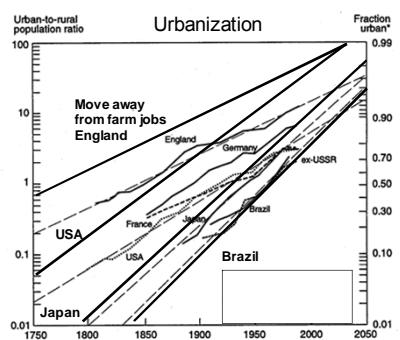

Spatial Relocation 2: Moving into Cities

Technik & Umwelt

Arnulf Grüber

Drivers: What's the Chicken and What's the Egg?

Technik & Umwelt

Summary Block 3

- Economic Impacts = output and scale, productivity and efficiency, costs and prices, variety and complexity, division of labor, interdependence (clusters, network externalities)
- Social impacts: = population, life expectancy, productivity (less work with higher pay), structural change: work - pleasure, primary - tertiary, rural - urban;
